APRIL 2022 WEEKLY READER #3

- VOL.4 ISSUE. 15

April Birthdays

- 17 Donna Adams
- 17 Barbara Spencer
- 25 Yvonne Ryan

April Facts/Birthstones

Zodiac - Aries (March 21 - April 19)
 Taurus (April 20 – May 20)
Birthstone - Diamond
Flower- Daisy and Sweet Pea

Please contact the Chapter Secretary
tmrc.daylight1145@gmail.com if you have
 a change of phone number or address.

**OES Chapter meeting this
 month will be on Monday
 the 25th at 1:30.**

Toothpaste

Toothpaste is a paste or gel used with a toothbrush to clean and maintain the aesthetics and health of teeth. It is used to promote oral hygiene: it is an abrasive that aids in removing dental plaque and food from the teeth, assists in suppressing bad breath and deliver active ingredients (such as fluoride) to help prevent tooth decay and gum disease. Early toothpastes - Since 5000 BC, the Egyptians made a tooth powder, which consisted of powdered ashes of ox hooves, myrrh, powdered and burnt eggshells, and pumice. The Greeks, and then the Romans, improved the recipes by adding abrasives such as crushed bones and oyster shells. (...more on page 2)

Grab a pencil and piece of paper. How many words can you make using the letters in "Barnyard" We found 30! (Tough one!)

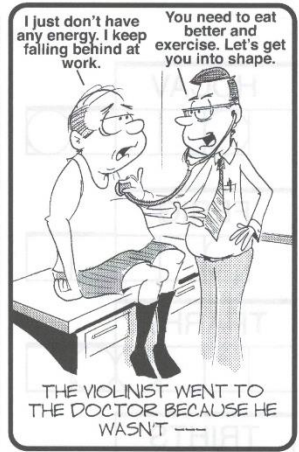

JUMBLE

Unscramble these four Jumbles, one letter to each square, to form four ordinary words.

SUDOE
 LOFDO
 RIDFAT
 QICATU

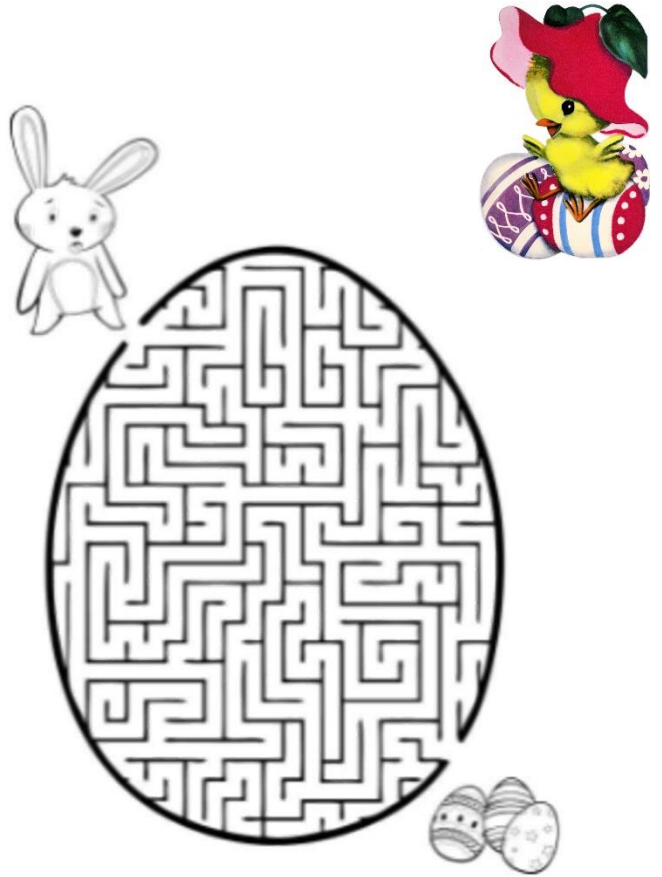

Now arrange the circled letters to form the surprise answer, as suggested by the above cartoon.

- CREST
- MARVIS
- CLOSE-UP
- JASON
- EUTHYMOL

-- FIT AS A FIDDLE
Jumble answers: DOUSE, FLOOD, SDRIFT, ACQUIT

(... toothpaste continued)

Fluoride was first added to toothpastes in the 1890s. Tanagra, containing calcium fluoride as the active ingredient, was sold by Karl F. Toellner Company, of Bremen, Germany, based upon the early work of chemist Albert Deninger. Fluoride toothpastes developed in the 1950s received the American Dental Associations (ADA) approval. Procter & Gamble developed a joint research project team headed by Joseph C. Muhler at Indiana University to study new toothpaste with fluoride. In 1955, Procter & Gamble's Crest launched its first clinically proven fluoride-containing toothpaste. On August 1, 1960, the ADA reported that "Crest has been shown to be an effective anticavity (decay preventative) dentifrice that can be of significant value when used in a conscientiously applied program of oral hygiene and regular professional care."

In 1880, Doctor Washington Sheffield of New London, CT manufactured toothpaste into a collapsible tube, Dr. Sheffield's Creme Dentifrice. He had the idea after his son traveled to Paris and saw painters using paint from tubes. In York in 1896, Colgate & Company Dental Cream was packaged in collapsible tubes imitating Sheffield. The original collapsible toothpaste tubes were made of lead.

Some toothpaste brands:

- Aim
- Aquafresh
- Close-up
- Colgate
- Crest
- Gleem
- Ipana
- Pepsodent
- Sensodyne
- Ultra Brite
