Fry Day**” We found **103!**

**National French Fries Day
Tuesday, July 13, 2021**

French fries, or simply fries (North American), chips (British and Commonwealth English), finger chips (Indian English), hot chips (Australian English) or French-fried potatoes, are deep-fried potatoes, which have been cut into batons.

French fries are one of the most popular dishes in the United States, commonly being served as a side dish to entrees and being seen in fast food restaurants.

The average American eats around 30 pounds of French fries a year.

July's:

birthstones - Ruby

flowers – Larkspur, Water Lily

zodiac signs - Cancer until July 22 and Leo from July 23

Tree: Apple, Fir, Elm, Cypress

July Birthdays

- | | |
|-----------|------------|
| 12 Juanna | McLerran |
| 12 Don | Sebastian |
| 15 Tricia | Henderson |
| 19 Mary | Tomlinson |
| 24 Yvonne | Brownfield |
| 28 Rowena | DeLano |

JUMBLE

Unscramble these four Jumbles, one letter to each square, to form four ordinary words.

GUNEB

YOHNP

MASHNO

RACCIT

Now arrange the circled letters to form the surprise answer, as suggested by the above cartoon.

THE “DOG DAYS” OF SUMMER last from July 3 to August 11.

The term “Dog Days” traditionally refers to a period of particularly hot and humid weather occurring during the summer months of July and August in the Northern Hemisphere.

In ancient Greece and Rome, the Dog Days were believed to be a time of drought, bad luck, and unrest, when dogs and men alike would be driven mad by the extreme heat. Today the Dog Days are associated purely with the time of summer’s peak temperatures and humidity.

WHY “DOG DAYS” OF SUMMER?

This period of sweltering weather coincides with the year’s heliacal (“at sunrise”) rising of Sirius, the Dog Star. Sirius is part of the constellation Canis Majoris—the “Greater Dog”, Sirius is the brightest star in the sky.

The exact dates of the Dog Days can vary from source to source, and because they are traditionally tied to the dawn rising of Sirius, they have changed over time. However, most sources agree that the Dog Days occur in mid- to late summer. Normally, we consider the Dog Days to be the 40 days beginning July 3 and ending August 11.

SIRIUS (The Brightest Star in the Sky)

Sirius is the brightest star in the sky, if you don’t count our own Sun. Under the right conditions, it can even be seen with the naked eye during the day. Sirius is one star in a group of stars that form the constellation Canis Major, meaning “Greater Dog.” It’s no surprise, then, that the nickname of this big, bold star became “the Dog Star.”

DOG DAYS OF SUMMER FOLKLORE

Old-timers believed that rainfall on the Dog Days was a bad omen, as foretold in this verse:

Dog Days bright and clear

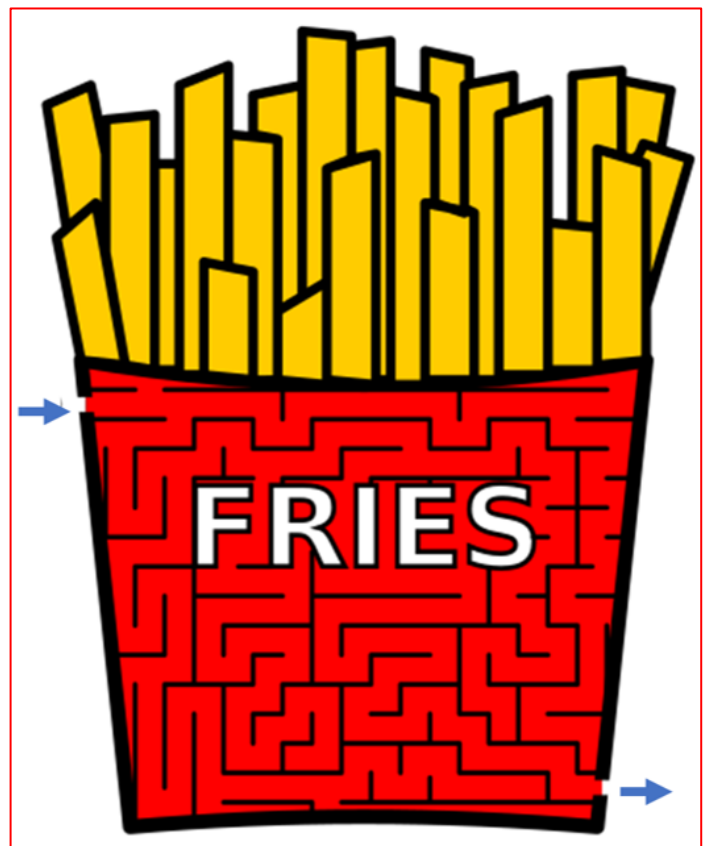

Indicate a happy year;

But when accompanied by rain,

For better times, our hopes **are vain.**
