Grab a pencil and piece of paper. How many words can you make using the letters in "Thirty Days" We found 49 !

June is the sixth month of the year in the Julian and Gregorian calendars, the second of four months to have a length of 30 days,.

Thirty days has September, April, June, and November, All the rest have thirty-one, Save February at twenty-eight, But leap year, coming once in four, February then has one day more.

An alternative version goes:

Thirty days hath September, April, June, and November, All the rest have thirty-one, Except February, twenty-eight days clear, And twenty-nine in each leap year. Thirty days have November, April, June, and September. February has 28 alone, And all the rest have 31.

**D-Day Remembrance - June 6<sup>th</sup>.** The D-Day landings in 1944 were the biggest invasion by sea in history. It's a key date in the story of WW2. The landings took place on **6 June** after five years of war with Germany, who were led by the Nazis. The whole operation was codenamed Operation Overlord.

It is the largest amphibious assault in world history. This massive, bloody battle was the turning point of the war in the European theater.

On this day, 156,000 troops from the United States, Great Britain and Canada stormed five beaches. American troops landed on Omaha and Utah beach. At the same time, British troops landed on Gold and Sword beach, and Canadian forces landed on Juno Beach. 4,000 Allied troops died on these beaches on D Day, 2,000 of them were American.

Please take a moment of silence, and thank the many soldiers who fought and died for our country on D Day.
