

WM Barbara Spencer
WP Joe Spencer

**TMRC Daylight Chapter 1145
Order of the Eastern Star
meeting will be on the 27th of
June at 1:30 pm .**

June Birthdays
24 Ed Hjorth
25 John Parrott
26 Donna Pope

June Facts

Zodiac - Gemini (May 21 – June 20) - **Cancer** (June 21 – July 22)
Birthstone - pearl, moonstone, alexandrite (3 BIRTHSTONE BECAUSE SOME HAVE BECOME SO RARE)
Flower- Rose

Grab a pencil and piece of paper.
How many words can you make using the letters in “**Chewing Gum**” We found 37 !

Chewing gum is a soft, cohesive substance designed to be chewed without being swallowed. Modern chewing gum is composed of gum base, sweetener, softeners, flavors, colors, and, typically, a hard or powdered polyol coating. Chewing gum in many forms has existed since the Neolithic period. 5,000-year-old chewing gum made from birch bark tar, with tooth imprints, has been found in Kierikki in Finland. The Mayans and Aztecs were the first to exploit the positive properties of gum; they used chicle, a natural tree gum, as a base for making a gum-like substance, and to stick objects together in everyday use. Forms of chewing gum were also chewed in Ancient Greece. The Ancient Greeks chewed mastic gum, made from the resin of the mastic tree. (...more next page)

JUMBLE

Unscramble these four Jumbles, one letter to each square, to form four ordinary words.

GREEV
CATHH
CLENGA
DARUSB

Now arrange the circled letters to form the surprise answer, as suggested by the above cartoon.

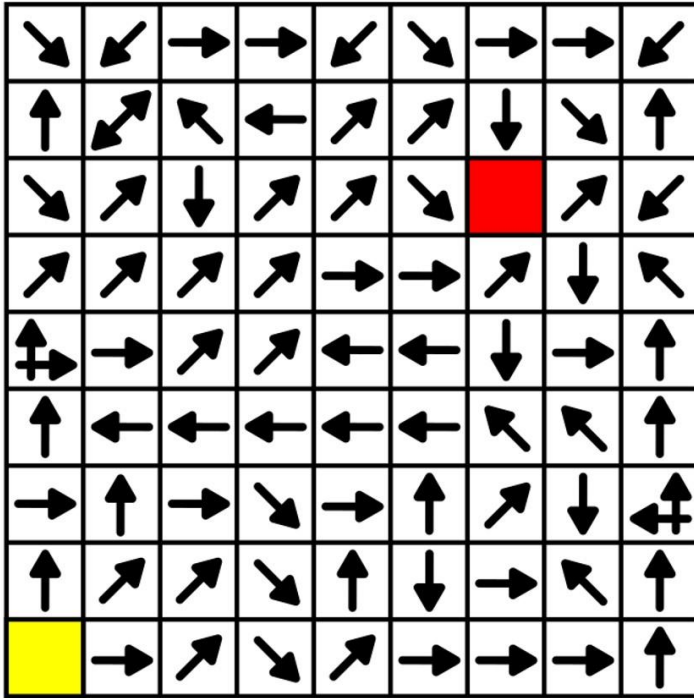

Print answer here

CHEWING GUM

- CLOVE
- BIG RED
- BEECH NUT
- RAZZLES
- SPEARMINT
- BLACK JACK
- DENTYME
- FREEDENT
- TEABERRY
- DOUBLEMINT
- JUICYFRUIT
- ORBIT
- WINTERFRESH
- FRUIT STRIPE
- BEEMANS

START FROM THE **YELLOW** SQUARE AND
END IN THE **RED** FOLLOWING THE ARROW
IN THE DIRECTION SHOWN.

FIND 6 DIFFERENCES

(... Chewing gum cont'd)

The American Indians chewed resin made from the sap of spruce trees. The New England settlers picked up this practice, and in 1848, John B. Curtis developed and sold the first commercial chewing gum called The State of Maine Pure Spruce Gum.

Modern chewing gum was first developed in the 1860s when chicle was brought from Mexico .

Chiclets (1899), and Wrigley's Spearmint Gum were early popular gums that quickly dominated the market and are all still around today.

Chewing gum gained worldwide popularity through American GIs in WWII, who were supplied chewing gum as a ration and traded it with locals. Synthetic gums were first introduced to the U.S. after chicle no longer satisfied the needs of making good chewing gum.

In the United States, chewing gum experienced a decline in popularity in the early 21st century, as it lost its association with counterculture and teenage rebelliousness. Others blamed smartphones reducing impulse purchases at the checkout. Chewing gum is rather shelf stable because of its non-reactive nature and low moisture content. The water activity of chewing gum ranges from 0.40 to 0.65. The moisture content of chewing gum ranges from three to six percent. In fact, chewing gum retains its quality for so long that, in most countries, it is not required by law to be labeled with an expiration date. If chewing gum remains in a stable environment, over time the gum may become brittle or lose some of its flavor, but it will never be unsafe to eat

Jumble answers: VERGE, HATCH, GLANCE, ABSURD
GAVE HER A HAND
