May Birthdays

- 24 Marie Sutton
- 29 Pauline Hornsten
- 30 Evan Kirkpatrick
- 31 Betty Robertson

May Facts

Zodiac - Taurus (April 20 to May 20)
- Gemini (May 21 to June 20)

Birthstone - emerald
Flower- lily of the valley.

May 30 - Memorial Day

Grab a pencil and piece of paper.
How many words can you make
using the letters in "Snapping
Turtle" We found 121 !

Please contact the Chapter Secretary
tmrc.daylight1145@gmail.com if you
have a change of phone number or
address.

**TMRC Daylight
Chapter #1145
Order of the
Eastern Star
Meeting is this
coming Monday
the 23rd at 1:30 pm**

Armed Forces Day

**Celebrated on the Third Saturday in
May**

This is a day to salute all the men and women in all branches of military, who protect our country. They can be called upon at a moment's notice to perform risky and perilous missions for freedom and country. They train diligently both physically and mentally, so they will be prepared to prevail in any mission they face.

Once, each branch of the military had their own day of celebration. On August 31, 1949 Secretary of Defense Louis Johnson announced the creation of Armed Forces Day. President Harry Truman announced the holiday in a presidential proclamation on February 20, 1950. All branches of the military were asked to celebrate on this day. The first Armed Forces Day was held on May 20, 1950.

JUMBLE

Unscramble these four Jumbles, one letter to each square, to form four ordinary words.

-- ROPED INTO IT

World Turtle Day is an annual observance occurring every May 23.

The day was created as a yearly observance to help people celebrate and protect turtles and tortoises and their disappearing habitats around the world as well as to encourage human action to help them survive and thrive.

The turtle shell is a visual match for the days and moons in a lunar year. If you look at a turtle's shell, you will see an outer ring of small scales. These represent the 28 days in a lunar month. You will also see larger scales inside the center of the shell. These large scales represent the 13 moons that occur each lunar year.

Many Native American people look at Turtle's back as a sort of calendar, with its pattern of 13 large scales standing for 13 moons in each year.

Depending on how we measure a lunar month, the moon goes around the earth in approximately 28 days. This means that in one year (365 days), the moon goes around 13 times, giving us 13 lunar months with 28 days each.

And if you examine a turtle's shell, you will find the same pattern of numbers of lunar months in a year and days in a lunar month:
